

Partner with Epsilon Systems for Comprehensive Environmental Services

Epsilon Systems offers a range of environmental services designed to help our clients comply with regulatory requirements and minimize the environmental impact of their projects.

Our team of experts includes environmental scientists, engineers, and planners who can help you at every stage of your project.

Our approach: working collaboratively with our clients to develop tailored solutions for successful outcomes.

For over 25 years, we have provided environmental services to a wide range of industries. Our services include:

- **Environmental assessments** (CEQA/NEPA) to identify potential impacts
- **Permitting and compliance services** (federal, state, and local regulations) to ensure regulatory requirements are met
- **Natural resources management** (Endangered Species Act, Section 7 Coordination) to protect sensitive habitats and species
- **Cultural resources management** (Section 106 and 110 consultations) to preserve historic sites and artifacts

Cultural Resource Management

At Epsilon Systems, we understand the importance of preserving cultural resources. Our team of experts includes qualified archaeologists, historians, and architectural historians, each with extensive experience in California and New Mexico.

We offer comprehensive cultural resources management programs, designed to help our clients protect and manage historic sites, artifacts, and landscapes.

Key services:

- Prehistoric and historic surveys, testing, and data recovery
- Section 106 and 110 consultations
- Mitigation planning and monitoring
- Curation and archival management
- Ethnographic studies
- Archival research
- HABS and HAER documentation
- NEPA and CEQA documentation
- Historical architecture

Preserving the past
to build a better future.

Project Examples

We take pride in delivering

high-quality environmental services to our clients. Here are some examples of projects we have completed:

- Environmental impact assessments for a large-scale commercial development in California
- Cultural resources management for a historic preservation project in New Mexico
- Natural resources management for a wetlands restoration project in California
- Permitting and compliance services for a renewable energy project in New Mexico

Natural Resource Management

Epsilon Systems' commitment to natural resources management reflects our belief in protecting the environment for future generations. Our team of experts provides comprehensive planning and support services, including surveying, assessing, and managing species of concern and their habitats.

Key services:

- Sensitive plant and wildlife surveys
- Biological baseline studies
- Endangered Species Act support (U.S. Fish and Wildlife Service Section 7 coordination)
- Mitigation planning and monitoring (best management practices)
- Integrated Natural Resource Management Plans
- Environmental impact assessments, including CEQA/NEPA documentation
- Surface and groundwater quality investigations
- Watershed studies

Our team of experts is dedicated to providing exceptional service and delivering solutions that meet our clients' needs. Contact us today to learn more about our environmental services and how we can help you achieve your goals.

Preserving the environment
for future generations.
