

EPSILON[®]
Systems Solutions, Inc.

ARE YOU innovative enough?

Epsilon Systems is a large national technical services company that provides total life cycle support to defense systems, including basic research, concept development, system architecture, requirements definition and testing, software development, integration and testing, operations, maintenance and training. Customers include government agencies (DOD - Navy, Army; DHS, DOE) and commercial companies (Volkswagen, Bosch Tools, GE Healthcare).

DOE PAST PERFORMANCE

- Engineering, Technical Services and Work Planning & Control
Sandia National Laboratory - Albuquerque, NM
TA-V Engineering & Technical Services Support & Work Planning & Control (WP&C).
- Safety Training
DOE National Training Center (NTC) - Albuquerque, NM
Training to the Department of Energy staff for the National Training Center's Safety Center of Excellence.
- Advanced Mixed Waste Treatment Project
Idaho Falls, ID
Retrieval, characterization, treatment, storage, packaging, and shipment of transuranic (TRU) waste from the Idaho National Laboratory.

DOD PAST PERFORMANCE

- Navy Submarine Learning Channel
Groton, CT
On-board submarine library of learning-based videos.
- Army Simulator
Fort Belvoir, VA
5kW AMMPS Generator real-time 3D troubleshooting simulation training tool.

OPERATIONS & MAINTENANCE

Simulations bring to life complex multicomponent technical software and hardware systems for ease in operations and maintenance.

Applications: advanced radiographic systems, reactors, radiation detection instrumentation, and weapon systems

TRAINING

Training-simulations, videos, and tablet tools lower costs for training of complex technical systems.

Applications: emergency response and security exercises; operations and maintenance of balance of plant and mission equipment
