

Nuclear Operations Solutions

Nuclear and Industrial Facility Operational Services to DOE and NNSA

PROFESSIONAL SERVICES

- Nuclear and Non-nuclear Safety Basis/Authorization Support
- Configuration Management, Conduct of Operations, and Conduct of Maintenance
- Work Planning and Control Program Design, Implementation and Review Support
- Complete Systematic Approach to Training (SAT) Program Support-Facility Representative Training
- Full Range of Program Assessment Support (RA, ORR, MSA, etc.)

Epsilon Systems Nuclear Operations Solutions division provides nuclear and industrial facility operational services to a range of DOE and NNSA customers. Our personnel have qualifications and experience at multiple DOE sites include the National Nuclear Security Administration (NNSA), Idaho National Laboratory, Argonne National Laboratory, Nevada Site Office, Idaho Operations Office, Idaho National Engineering and Environmental Laboratory, Los Alamos National Laboratory, Sandia National Laboratory, National Security Technologies, Hanford Waste Treatment Plant and Savannah River Site.

We also offer technical training design, development, delivery, evaluation, assessments, and performance management and measurement expertise. Training Program Development and implementation services include:

- Instructional Systems Design and Development
- Training Program Evaluation and Assessment
- Training Program Management
- Training Center Management and Administration
- Training Course Offerings (partial listing)
 - Conduct of Operations
 - Conduct of Maintenance
 - Configuration Management
 - Introduction to Nuclear Safety Basis
 - Performance Monitoring

(Continued)

Nuclear Operations Solutions

Corporate capabilities that augment Nuclear Operations Solutions services providing beneficial services to DOE and NNSA include:

- Software Engineering and Development
- Information Assurance/Network Defense
- Leading Edge Digital Immersive Training
 - Animation/3D Modeling/Simulation
 - e-Learning
 - Application Development
- Full Array of Environmental Management Services
- Geographic Information Services

Epsilon Systems is a diversified professional and technical services company providing capabilities across the entire engineering and sustainment life cycle. Our mission is to be one of the most highly recognized and successful government contractors in the U.S. as defined by our services, technologies, growth, and culture. Founded in 1998 and headquartered in San Diego, CA, Epsilon Systems has nearly one thousand employees in more than 20 locations throughout the U.S. Epsilon Systems customers include the Department of Energy, Department of Defense, Department of Homeland Security and non-profit and commercial customers. As a long-term DOE and NNSA support contractor, Epsilon Systems understands the requirements, protocols and mission of DOE.

Epsilon Systems Certifications and Qualifications

- ISO 9001:2008 Certified and Compliant Quality Management Systems
- CMMI Level II Development
- Corporate Fully Qualified Navy Validator (DOD/DON Information Assurance)
- Certified for Militarily Critical Technical Data
- DCAA Reviewed / DFARS Compliant Accounting System
- DCMA Approved Purchasing System

Epsilon Systems business groups include Mission Solutions Group, Mission Readiness Group, Technical Services Group and KAB Laboratories, an Epsilon Systems company.

Mission Solutions Group (MSG) develops and integrates solutions that support mission success of critical systems such as secure communications, satellite systems, nuclear facility performance assurance, network operations, program, training, and administrative services and environmental management services including leading-edge GIS solutions.

Mission Readiness Group (MRG) repairs and modernizes submarines, surface ships, aircraft carriers and service craft for the U.S. Navy, Military Sealift Command, U.S. Coast Guard and commercial customers. They support Alteration Installation Team (AIT) installations in support of the Regional Maintenance Centers, Naval Warfare Centers and Space and Naval Warfare Systems Command.

Technical Services Group (TSG) provides engineering, technical, logistics and program management services. Primary customers include Navy Regional Maintenance Centers, Navy Systems Commands, Naval Warfare Centers, Type Commanders and a wide-array of commercial companies.

KAB Laboratories delivers high-quality products, software and systems engineering, and training with speed, agility, and innovation. KAB Laboratories was certified CMMI Level II for Software Development in 2014.
